

Setting up Basic/Deluxe Rejuvenation Tube with CD Player

Unwrap the **Deluxe Rejuvenation Tube**, remove Quartz Discs from top of Tube. Turn Tube on side and lower small 5/8" carbon rods into each crystal tube, place all 3 (C) **Consciousness** inserts into the quartz crystal tubes (**carbons on the bottom**)

- Stand Rejuvenation Tube upright and place the three 2.5" Quartz Crystal Discs on top.
- Connect the 2 pair leads from Rejuvenation Cube to + R - and - L + to the lower rear amp terminal.
- Connect 1 external Scalarcoil to + R - and one Scalarcoil to - L + to the top rear amp terminal.
- Inserts 5/8" carbon rods and Inert Noble Gas you selected into the external Scalarcoils (**carbons on the bottom**)
- Connect CD player "Y" connectors to **Amp 1** and **Amp 2** RCA audio inputs on the Amplifiers.

5 CDs are used in the Rejuvenation Vortex program. Place CDs marked 1, 3, & 5 into the drawers marked 1, 3, & 5, place CDs marked 2 & 4 into the drawers marked 2 & 4. The "Y" connectors split the CD player audio output. This allows us to send the complex audio program information to the Rejuvenation Tube Amplifiers and the Philips SPA7351 Sound system.

Do not over drive the Rejuvenation Tube Amplifier for long periods of time as heat may damage the coils

Make the necessary adjustments to the amplifiers (Basic has 1 amp, Deluxe has 2 amps). Turn Treble down and Bass all the way up. Make sure the audio button is **pushed in**. Adjust the power control dial to $\frac{3}{4}$. Heat should not be a problem, but hold the External coils from time to time and make sure they are not running too hot. Some of the programs will cause the LEDs to fire while some may not depending on the frequencies that are being played. The RTube CDs contain very complex programs that introduce frequencies as low as 3 hertz. This is beyond the range of hearing but have a huge and direct influence on the brain. We added a 6th CD that creates 72 minutes of silence. It is provided as an option when a little less stimulation would be helpful. This CD could be placed in the 3 or 5 position when needed.

Playing your personal VAHS Frequency Program

Use your VAHS software program to create your personal VAHS frequency CDs. Then use the Rejuvenation Tube to play your program. Remove **CD 5** from the drawer. Use the Disc skip button to rotate the wheel. After closing the drawer **select Disc 5**, then play and enjoy your personal frequency program. Hold the External Scalarcoil and place the body pain pad where needed, (navel etc.). After session, return the original disc and re-start Vortex program. Use the repeat function and the program will continue to run. *If desired, you may leave your personal CD in and allow it to cycle with the 24 hour program. Just make sure you are allowing for ample rest, not always stimulating your system. The Vortex program is designed to balance stimulation and rest.*

Basic Rejuvenation Tube

Unwrap the **Basic Rejuvenation Tube**, remove Quartz Discs from top of cube. Turn Tube on side and lower small 5/8" carbon rods into each crystal tube, place the 5 in 1 Inert Noble Gas into the front quartz crystal tube and the remaining 2 (C) Consciousness inserts into the back two quartz crystal tubes (**carbons on the bottom**)

- Stand Rejuvenation Tube upright and place the three 2.5" Quartz Crystal Discs on top.
- Connect 1 pair of leads from Rejuvenation Tube to + R - and - L + to amp terminal.
- Connect 1 external Scalarcoil and 1 pair of leads to + R - amp terminal. Insert 5/8 carbon on the bottom.
- If you purchased extra noble gas then place in this coil.
- Connect CD player "Y" connectors to RCA audio inputs on the Amplifier as shown above.
