

### Setting up Rejuvenation Cube with CD Player

Unwrap the Rejuvenation Cube, remove Quartz Discs from top of cube, remove tape holding quartz crystal tube down. Turn cube on side and lower small carbon rods into each crystal tube, place the 5 in 1 Inert Noble Gas into the front quartz crystal tube and the remaining 2 ( C ) Consciousness inserts into the back two quartz crystal tubes (carbons on the bottom)

- Stand Rejuvenation Cube upright and place the three 2.5" Quartz Crystal Discs on top.
- Connect one of the leads from the Rejuvenation Cube to **Channel One** of the rear connectors.
- Connect LED body, pain pad and lead from the Rejuvenation Cube to **Channel Two** of the rear connectors.
- Connect CD player "Y" connector to RCA **Channel 1** and **Channel 2** audio inputs on the Rolls Amplifier.

5 CDs are used in the Rejuvenation Vortex program. Place CDs marked 1, 3, & 5 into the drawers marked 1, 3, & 5, place CDs marked 2 & 4 into the drawers marked 2 & 4. The "Y" connectors split the CD player audio output. This allows us to send the complex audio program information to the Rejuvenation Cube Rolls Amplifier and the Philips SPA7351 Sound system.

**Rolls Amplifier instructions concerning the BURN WARNING!** THE FRONT PANAL OF THE RA235 IS THE HEAT DISTRIBUTION FOR THE OUTPUT STAGES. IF THE UNIT IS OPERATED AT HIGH VOLUMES FOR LONG PERIODS IT WILL GET HOT.

### Do not over drive the Rejuvenation Cube as heat can damage the coils

Keeping the volume controls about **half way** is a good place to start. Some of the programs will cause the LEDs to fire while some will not depending on the frequencies that are being played. This is the reason the LEDs do not fire all the time. Always keep the volume controls about half way to prevent over heating the coils. The LED's are a secondary means of stimulation. The deepest changes are created by the Sacred Scalar Miracoils and the Inert gases. The Rejuvenation CD contains a very complex program that introduces frequencies as low as 3 hertz. This is beyond the range of hearing but has a direct influence on the brain.

### Playing your personal VAHS Frequency Program

Use the VAHS software program to create your personal VAHS frequency CDs. If you do not own one of our VAHS systems then you can use the Rejuvenation Cube. Remove CD 5 from the drawer. Use the Disc skip button to rotate the wheel. After closing the drawer select Disc 5, then play and enjoy your personal frequency program. Return the original disc and re-start Vortex program. Use the repeat function and the program will run for over 24 hours, (5 rotations) before stopping.
